ZX-128-XS

CCTV Camera Base & Junction Box

Aluminium	Ø100 × 43.2 × 129mm	White
Material	Dimensions	Colours Available

Product overview

The ZX-128-XS is a professional Deep Base CCTV Camera Junction Box designed to provide additional internal space for cable management, connectors, baluns, PoE adaptors, and CCTV terminations. Ideal for dome, turret, and compatible surveillance cameras, this deep base allows installers to achieve a clean and professional installation while protecting cable connections from environmental exposure.

Manufactured from durable aluminium construction, the ZX-128-XS offers excellent corrosion resistance and long-term reliability for both indoor and outdoor CCTV installations. Its deep internal cavity provides significantly more cable storage capacity compared to standard camera bases, making it ideal for installations requiring larger cable connections, video baluns, RJ45 terminations, and PoE accessories.

Available in White, the ZX-128-XS is suitable for residential, commercial, retail, warehouse, and industrial surveillance systems.
