4.0mm	3.0mm	200mm × 200mm × 280mm	4 x R-Clips Included
Outer Wire Diameter	Inner Wire Diameter	Dimensions	Fixings

Product overview

The ZX-CAGE-200X200 Cage is a robust protective enclosure designed to safeguard CCTV cameras and other security equipment from vandalism, accidental damage, and bird interference. Manufactured from galvanised steel wire with a durable black PVC coating, this protective cage provides long-lasting corrosion resistance and reliable protection in both indoor and outdoor environments.

Featuring a heavy-duty construction with 4.0mm outer wire and 3.0mm inner wire, the cage offers excellent strength while maintaining clear visibility for camera operation. Supplied with 4 retaining R-clips, installation and maintenance are quick and straightforward, allowing easy access when required.

Ideal for protecting CCTV cameras in warehouses, schools, transport hubs, industrial facilities, commercial buildings, car parks, sports centres, and public spaces, the ZX-CAGE-200X200 helps extend equipment life while reducing maintenance costs.
