ZX-MAG-LOCK-280K-S

280KG Magnetic Door Lock

280KG (600lb) holding force

Slimline design

12V/24V DC operation

Strong aluminium housing

Product overview

The ZX-MAG-LOCK-280K-S is a professional electromagnetic door lock designed for secure access control installations requiring reliable locking performance and dependable operation. With a strong 280KG (600lb) holding force, this magnetic lock is ideal for offices, commercial buildings, warehouses, schools, apartments, gates, and industrial security environments.

Designed for use with access control systems, keypads, exit buttons, intercoms, and door entry systems, the ZX-MAG-280-S provides fail-safe locking operation for single door applications. Its slimline design and durable aluminium housing make it suitable for both new installations and upgrade projects across residential and commercial environments.

Supporting 12V/24V DC operation, the lock delivers stable and efficient performance while offering compatibility with a wide range of professional access control systems. Suitable for inward and outward opening doors when used with compatible brackets.
