ZX-MOUSE-BAT

Wireless Mouse with Battery

Product overview

The ZNEX Battery Powered Wireless Mouse provides a simple, practical and reliable solution for everyday computer navigation, offering the convenience of wireless operation without the restrictions of a traditional wired mouse.

Designed with a compact, comfortable profile, this mouse features a stylish silver-grey body with a contrasting black top panel, making it suitable for both professional and home environments.

The battery-powered design features an accessible battery compartment, allowing batteries to be replaced when required without the need for charging cables.

With responsive left and right buttons, a central scroll wheel and smooth optical tracking, the mouse is ideal for office computers, laptops, CCTV workstations and everyday desktop applications.
