ZX-PSU-5AMP

12V 5A DC Power Supply Adapter

12V DC regulated power supply

5A output capacity

Ideal for access control systems

Built-in overload protection

Product overview

The ZX-PSU-5AMP 12V 5A DC Power Supply Adapter is a reliable power solution designed for CCTV systems, access control equipment, LED lighting, networking devices, and other low-voltage applications requiring a stable 12V DC output.

Providing up to 5 Amps of output current, this power adapter is ideal for powering multiple CCTV cameras, DVRs, LED strips, wireless devices, and security equipment from a single power source. Its compact plug-and-play design makes installation quick and straightforward, while built-in protection circuitry helps safeguard connected equipment from overloads, short circuits, and voltage fluctuations.

Suitable for both professional installers and DIY users, the ZX-PSU-5AMP delivers dependable performance for a wide range of security and electrical applications.

Product code	ZX-PSU-5AMP

Key features

- 12V DC regulated power supply
- Stable and reliable power delivery
- Ideal for access control systems
- Built-in overload protection
- Plug-and-play installation
- 5A output capacity
- Suitable for CCTV cameras and DVRs
- Compatible with LED lighting applications
- Short circuit protection
- Compact and durable design
